

ANIRUDDH PARALIKAR

AI TRANSFORMATION LEADER | GENAI SOLUTION ARCHITECT | AI & DATA COE LEADER

connectwithaniruddh@gmail.com | linkedin.com/in/aniruddhparalikar

EXECUTIVE PROFILE

AI transformation and enterprise architecture leader with 16+ years of experience translating business strategy into scalable AI, data, automation, and operating-model change. **Expertise spans AI & Data Center of Excellence (CoE) leadership, GenAI strategy, Azure AI, agentic systems, governance, value realization, and enterprise solution delivery.** Trusted advisor to executives and business leaders across finance, audit, legal, life sciences, sales, professional services, and technology operations.

LEADERSHIP HIGHLIGHTS

- Lead enterprise AI & Data CoE strategy, governance, architecture review, adoption, and reusable capability development for responsible, business-aligned AI transformation.
- Built ground up and governed Agentic Studio platform that helps to build conversational agents with tool calls. This led to 120+ reusable AI agents and 25+ plug-and-deploy GenAI assets across LegalTech, Life Sciences, Finance, Audit, Sales, and enterprise operations. Helped CoE and GTM team for quick solutioning in a user-friendly way.
- Delivered a GenAI solution that saved 1,300+ hours per month, generated quarterly savings equivalent to 9 FTEs, and supported \$500K in monthly recurring revenue.
- Architected AI-enabled workflows across EBP Audit, FP&A, procure-to-pay, order-to-cash, record-to-report, accounts payable, accounts receivable, and general ledger processes.
- Led teams of up to 12 and enabled 200+ sales executives through AI-assisted pipeline research, account intelligence, and opportunity-engagement workflows.

CORE COMPETENCIES

AI Transformation & CoE: AI strategy, operating models, portfolio governance, architecture review boards, AI adoption, value realization, change enablement

GenAI & Agentic AI: Azure AI Foundry, Azure OpenAI, Microsoft Copilot Studio, agentic workflows, multi-agent orchestration, RAG, vector search, MCP, evaluations, observability, tracing, red teaming

Enterprise Architecture: TOGAF, solution architecture, reference architecture, reusable assets, integration patterns, security, responsible AI, vendor and stakeholder management

Business Transformation: Finance transformation, audit transformation, intelligent document processing, anomaly detection, automation strategy, process optimization, pre-sales and solutioning

Platforms & Engineering: Python, FastAPI, REST/SOAP APIs, Microsoft Fabric, Salesforce, ServiceNow, Power Automate, UiPath, Ansible, Terraform, SQL Server, SSIS

PROFESSIONAL EXPERIENCE

Alliantgroup | Associate Director - AI, Data & Applied Intelligence CoE | Hyderabad, India

Feb 2026 - Present

- Lead the AI & Data CoE, defining enterprise AI strategy, governance, operating model, architecture standards, reusable assets, and adoption playbooks aligned with transformation priorities.
- Advise executives and domain leaders on Azure AI and GenAI roadmaps; serve on the Architecture Review Board to align technology investments with long-term business outcomes.
- Direct transformation use cases across audit, FP&A, O2C, P2P, and R2R, including invoice and vendor validation, terms recognition, tax and cover-sheet preparation, anomaly detection, and time-sheet integration.
- Design and scale Microsoft Fabric data agents, Salesforce chatbots, Copilot Studio agents, and Azure AI Foundry agents with observability, information tracing, and responsible-AI controls.

Capgemini | AI CoE Lead & Senior Manager, Data & AI

Nov 2024 - Jan 2026

- Led enterprise-wide AI strategy, roadmap, and governance for responsible, ethical, and scalable GenAI adoption across business functions and customer accounts.
- Managed GenAI architects and led solution architecture, customer delivery, demos, pre-sales offerings, and reusable asset innovation across global accounts.
- Directed development of 120+ reusable AI agents and 15+ deployable GenAI assets; led solutions in explainable AI, real-time speech scribing, context-aware assistants, and RAG knowledge mining.
- Designed an Agentic Experience Platform enabling citizen developers to create governed workflows and agent squads; delivered legal, life-sciences, and sales copilots that improved turnaround and engagement.

Ensono | Solutions Architect, Automation & Transformation

Mar 2024 - Nov 2024

- Established an automation-first architecture and opportunity pipeline across infrastructure, application monitoring, storage, backup, OS/database patching, reporting, networking, and service operations.
- Combined ServiceNow orchestration, Ansible playbooks, Terraform, GenAI, anomaly detection, and operational analytics to improve incident triage, auto-assignment, resolutions, MTTA, and MTTR.
- Created a reusable Automation Opportunity Library adopted by global infrastructure teams and delivered an end-to-end managed-server-build automation.

Zenoti | Senior Solution Architect & Solution CoE Leader

Apr 2018 - Mar 2024

- Led the Solution CoE roadmap, standardized solutioning and implementation lifecycle automation, and managed a 12-member team across performance, billability, sprint execution, and delivery outcomes.
- Built SensAI, an Azure OpenAI and Pinecone RAG solution that generated structured solution offerings and solutioning standards; saved 1,300+ hours monthly and 9 FTEs per quarter, supporting \$500K MRR.
- Improved implementation cost and velocity through heatmaps, data integration, and automation; reduced customer onboarding by 7 days and governed a portfolio of 20+ data architectures.
- Led customer implementation, onboarding, technical workshops, and cross-functional delivery; recognized for a 1TB+ medical-records migration from MongoDB to PDF.

SumTotal Systems | Implementation Consultant, Professional Services

Oct 2016 - Apr 2018

- Delivered end-to-end enterprise implementation and solution architecture for four 100K+ employee customers and three mid-market customers; managed discovery, fit-gap analysis, proposals, escalation, and adoption.
- Designed regulated learning and talent solutions for pharmaceutical organizations, supporting GxP and 21 CFR Part 11 audit requirements, integrations, competency mapping, and workforce development plans.

Capgemini | Senior Consultant, MyLearning & MyHire

Jan 2014 - Oct 2016

- Led requirements-to-deployment delivery, stakeholder and vendor management, fit-gap analysis, enterprise integrations, and a three-person team for SumTotal LMS programs.
- Reduced reporting-process time by 60% through data normalization and built automation that saved 1 FTE.

Aon Hewitt | Senior Software Engineer, e-Learning

Oct 2010 - Jan 2014

- Built Oracle/SQL Server reporting, SSIS packages, SSRS dashboards, content-hosting implementations, and LMS integrations; created reusable automation and reporting that reduced delivery time by 30%.
- Recognized with Champion, Premiere Team, Gold, Soaring Eagles, and Master Blaster awards for delivery excellence.

CERTIFICATIONS & EDUCATION

Certifications: TOGAF Certified Enterprise Architect | Lean Six Sigma Black Belt | Certified ScrumMaster (Scrum Alliance) | PRINCE2 Practitioner

Education: Bachelor of Engineering in Computers, University of Mumbai
